

RAVE ALERT SYSTEM

RAVE is a new homeless services alert system that sends messages to a mobile phone or email with info such as:

- Emergency shelter bed access and availability
- Changes in provider services and hours
- White Flag days (during extreme weather)
- Important community alerts

To sign up, scan the QR code below or go to louhomeless.org/RAVE, then complete the form by answering a few questions. Within seven days, you should start receiving messages.

Access to a cell phone or email address is required, and if you no longer wish to receive messages, you can stop them at any time.

RAVE is a project of the Coalition for the Homeless and Louisville Metro Office of Resilience & Community Services in partnership with local homeless service providers.
